# Jean Templeton

Chair of WMCA Homelessness Taskforce  
Chief Executive, St Basils

# Homelessness is fundamentally an equalities issue

It's about economic inequality at all levels, with some communities and people more exposed as a result of the structural inequalities of race, class and gender.

It's about policy and investment choices and access to education, decent jobs, housing, support.

It's about poverty which creates an inability to meet your own and your family's needs.

It's about power inequality and the pressure to focus on compliance with system expectations.

**It is not true that we are all no more than a pay cheque away from homelessness.**

## **Inter-related factors**

### **Structural factors**

**Poverty, inequality, housing supply and affordability, unemployment & insecure employment, welfare reform and policy failures, LHA levels**

### **Individual factors**

**Poor physical or mental health, violence and abuse, alcohol and drugs issues, bereavement, experience of care and/or prison; trauma**

“ The Taskforce’s ambition to design out homelessness is based on the principle that we need a shared regional approach to tackling structural inequalities, which cuts across sectors and disciplines, focussing on how service systems respond to people’s needs and how service systems inter-relate with each other so that they are inclusive of everyone, regardless of life circumstances.”
